An associated dBASE file, CFRFEB05.dbf, is distributed for use with this shapefile. This table can be used to perform a one-to-many relate from the polygon attributes. Each DTRSQQ polygon may contain multiple records in this database, based on the possibility of a quarter-quarter straddling multiple Counties.

This table does include those records for any Government and Fractional lots, which were not included in the GIS layer. Therefore, this table can also be used independently of GIS, to gather additional information.

*Process\_Step:*

*Process\_Description:*

This GIS layer was created by extracting quarter-quarter sections from the 1:24,000-scale LandNet data layer. An ORACLE database identifies PLSS quarter-quarter-sections containing County Forests. Due to the fact that Fractional and Government lots are not identified by Quarter-Quarter section in the ORACLE database, it was not possible to include them in this layer. These excluded areas account for approximately 2% of the total County Forest areas.
